

WHAT IS CLAIMED IS:

1. A mirror assembly for viewing a child sitting is a rear-facing child seat positioned on a vehicle seat having a seat back and a head rest with a gap therebetween, comprising:
 - a base plate removably connected to the head rest;
 - a mirror adjustably connected to the base.
2. The mirror assembly of Claim 1, further comprising:
 - means for mounting the base in communication with the head rest and the seat back over the gap;
3. The mirror assembly of Claim 1, further comprising:
 - a fastening strap extending from the base plate, the fastening strap having a first end and an opposing second end for looping the strap around the head rest; and
 - a connector means for coupling the first and second ends of the strap together.
4. The mirror assembly of claim 1, wherein the mirror housing and mirror are circular-shaped, and the base plate is circular-shaped.
5. The mirror assembly of claim 1, wherein the mirror housing and mirror are square-shaped, and the base plate is square-shaped.
6. The mirror assembly of claim 1, wherein the mirror housing and mirror are octagonal-shaped, and the base plate is square-shaped.
7. The mirror assembly of claim 1, wherein the mirror housing and mirror are rectangular-shaped, and the base plate is square-shaped.
8. The mirror assembly of claim 1, wherein the mirror housing and mirror are circular-shaped, and the base plate is square-shaped.
9. The mirror assembly of claim 1, further comprising a foam pad adhered to a surface of the base plate.

10. The mirror assembly of claim 1, wherein the base plate comprises multiple slots for inserting the fastening strap therethrough.
11. The mirror assembly of claim 1, wherein the connector means comprises a slotted buckle.
12. The mirror assembly of claim 1, wherein the connector means comprises male and female connectors.
13. The mirror assembly of claim 1, wherein the connector means comprises fastening hooks and loops.
14. The mirror assembly of claim 1, wherein multiple fastening straps extend from the base plate.
